

Scarab

Termite

## WerkMaster's *Scarab* & *Termite* Edge Out the Competition! On Concrete, Terrazzo, Stone, Hardwood, and VCT Tile.

WerkMaster™ introduces the Scarab and Termite. Recognizing a need for machines that can do more than just floors, such as; countertops, stairs, ledges and walls, WerkMaster™ with its Patented Octi-Disc™ Technology gives contractors a real edge.

Surpassing any hand grinder the Scarab is a dream to use and works with most variable speed polisher/grinders. Its patent pending 5 head

system uses standard 3" polishing pads or PCDS for tough coating removal. Handheld for countertops, or use the removable handle for stairs and floors.

Designed to get behind toilets, around plumbing and machinery, along bathtub ledges, stair risers, linen closets, and any hard to get to places.

Tired of wet grinding countertops? Can't refinish them in the home. Frustrated with the time and results?

Getting calls to refinish garages, basements, walkways, pools and decks? You need a Termite.

Protect your customer's investment with WerkMaster™ Environmentally Friendly and Food Safe **ULTRAGuard** sealer. Resistant to acid, coffee, mustard, ketchup, mayonnaise, vinegar, pickle juice, red wine and pop for up to 24 Hours without etching or staining!

Meet the family!

The Scarab was the "HIT of the SHOW" at World of Concrete 2010. Comments like "I have been waiting years for this!" "Every contractor should own one of these." make it the PERFECT complement to any contractor's arsenal of tooling.

Don't be fooled by the Termites size and weight. The Termite can tear into any surface and deliver results that are simply amazing. Run it on the floor like a conventional grinder or on countertops and stairs!

Featuring WerkMaster's 8 head Octi-Disc™ Technology and versatile 3" tooling, while edging to within 1/8" of the wall, the Termite is the choice of any contractor looking for speed, quality and exceptional results.

MACHINE SPECIFICATIONS	SCARAB	1200 TERMITE	
		110V	230V
Footprint: IN (cm)	7 x 10 (18 x 25)	12 x 12 (30.5 x 30.5)	
Disc Size:	3"	3"	
Weight: LBS (Kg)	20 (9.07) – w/o drive unit	100 (45)	
Disc Speed Range: RPM	0–2800	0–1800	
Horsepower:	as per drive unit	1.5	
Voltage: VAC	as per drive unit	110	208/230
Frequency: Hz	as per drive unit	50/60	
Amp Draw: 1 PH*	as per drive unit	15	9/8
Vacuum Req.: CFM	150	150	
Min. Generator: kW**	2.0+	2.5+	
Max. Cable Length: FT (m)***	50+ (15+)	50+ (15+)	

\* Current reading measured at the machine.

\*\* Minimum generator recommendations are based on the continuous kW rating of the generator not the peak/maximum kW rating. Never use a generator that doesn't meet the minimum requirement as damage might occur.

\*\*\* Maximum usable cable length depends on cable quality and cable gauge.
